Description: Seminar “eTwinning Cross-Curriculum projects” is planned for different subject teachers from grades 5 to 12, who are looking to improve quality of planning and organizing active learning activities using cooperation and ICT tools across different subject areas. Seminar will consist of three separate parts – first is to learn different ICT tools for content creation and collaboration. As example, 3D modelling and visualizations and digital map creation – how to make them and use as practical task for students? Second part is to enhance quality of planning and organizing lessons and activities for cross-curriculum activities and projects, where teachers will learn practical methods for planning their activities and cross-curriculum cooperation with other subject teachers. Third part of seminar is for project method and drafting eTwinning projects. Seminar is planned using learning by doing approach, therefore content will be activities driven according to learning objectives.
